

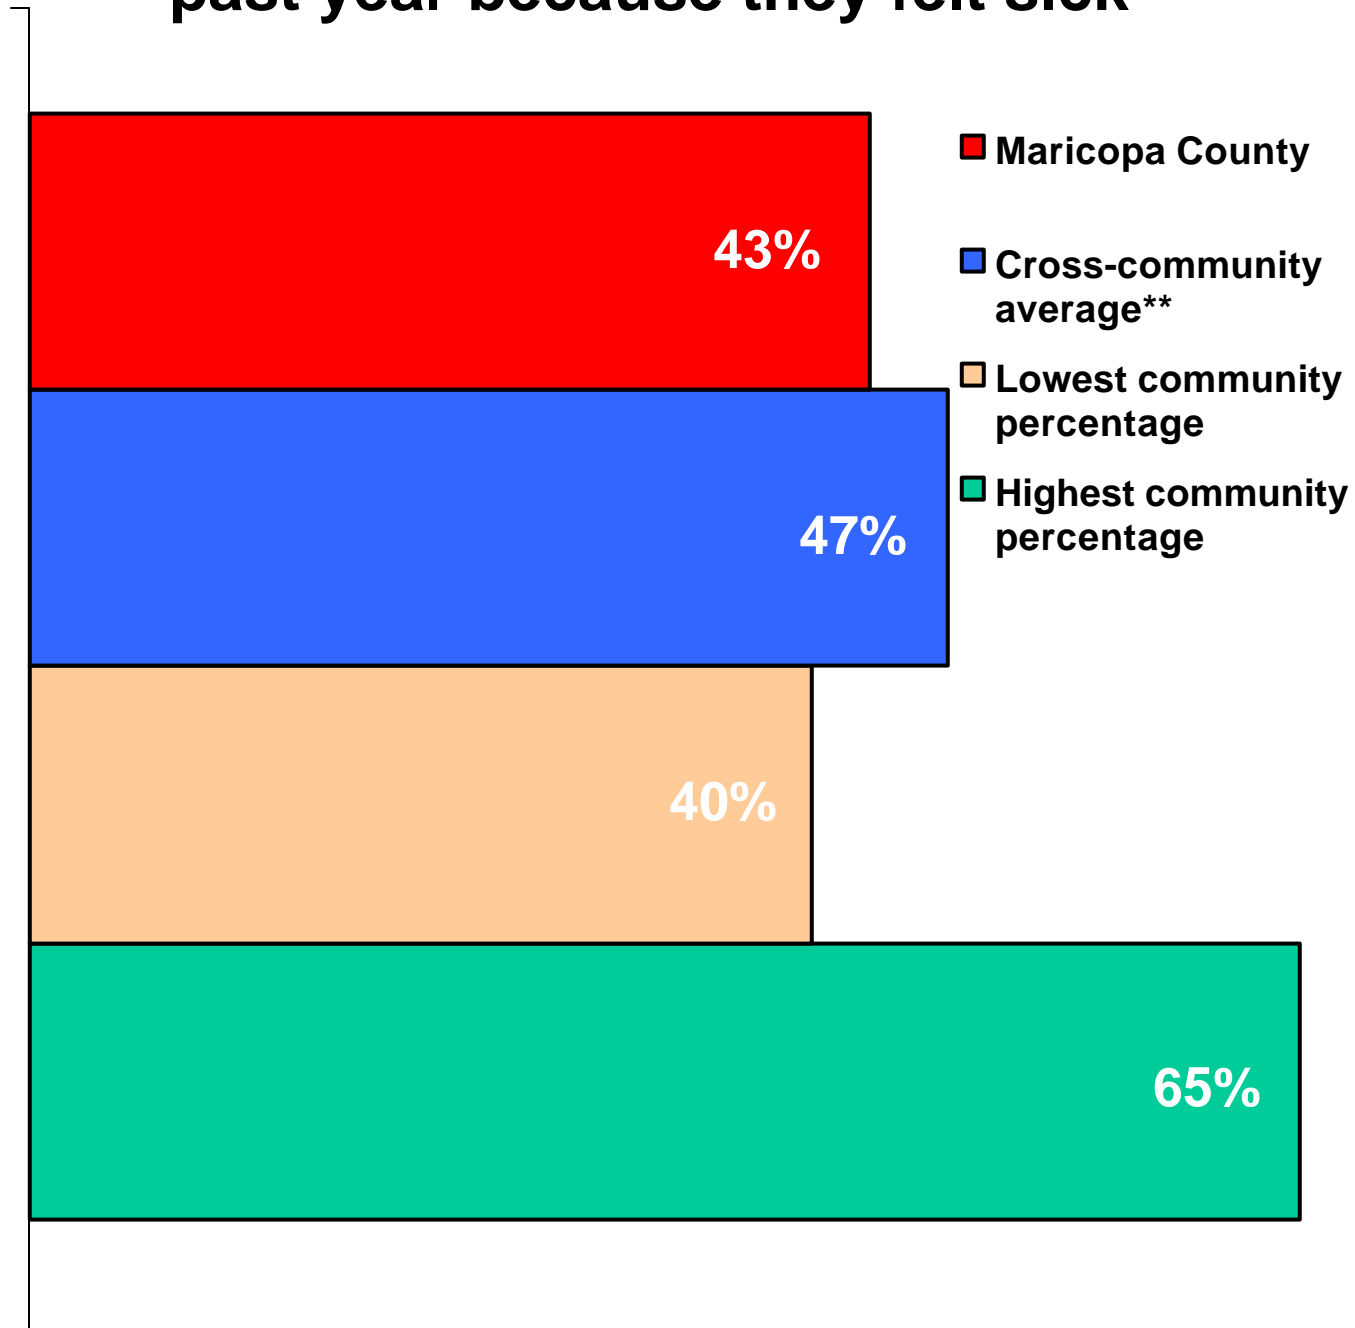

Figure 17.2

ALL-COMMUNITY COMPARISON

Percentage of people age 65+ who thought they needed medical care in the past year because they felt sick*

* People were asked whether in the past year there was a time when they thought they needed medical care because they felt sick.

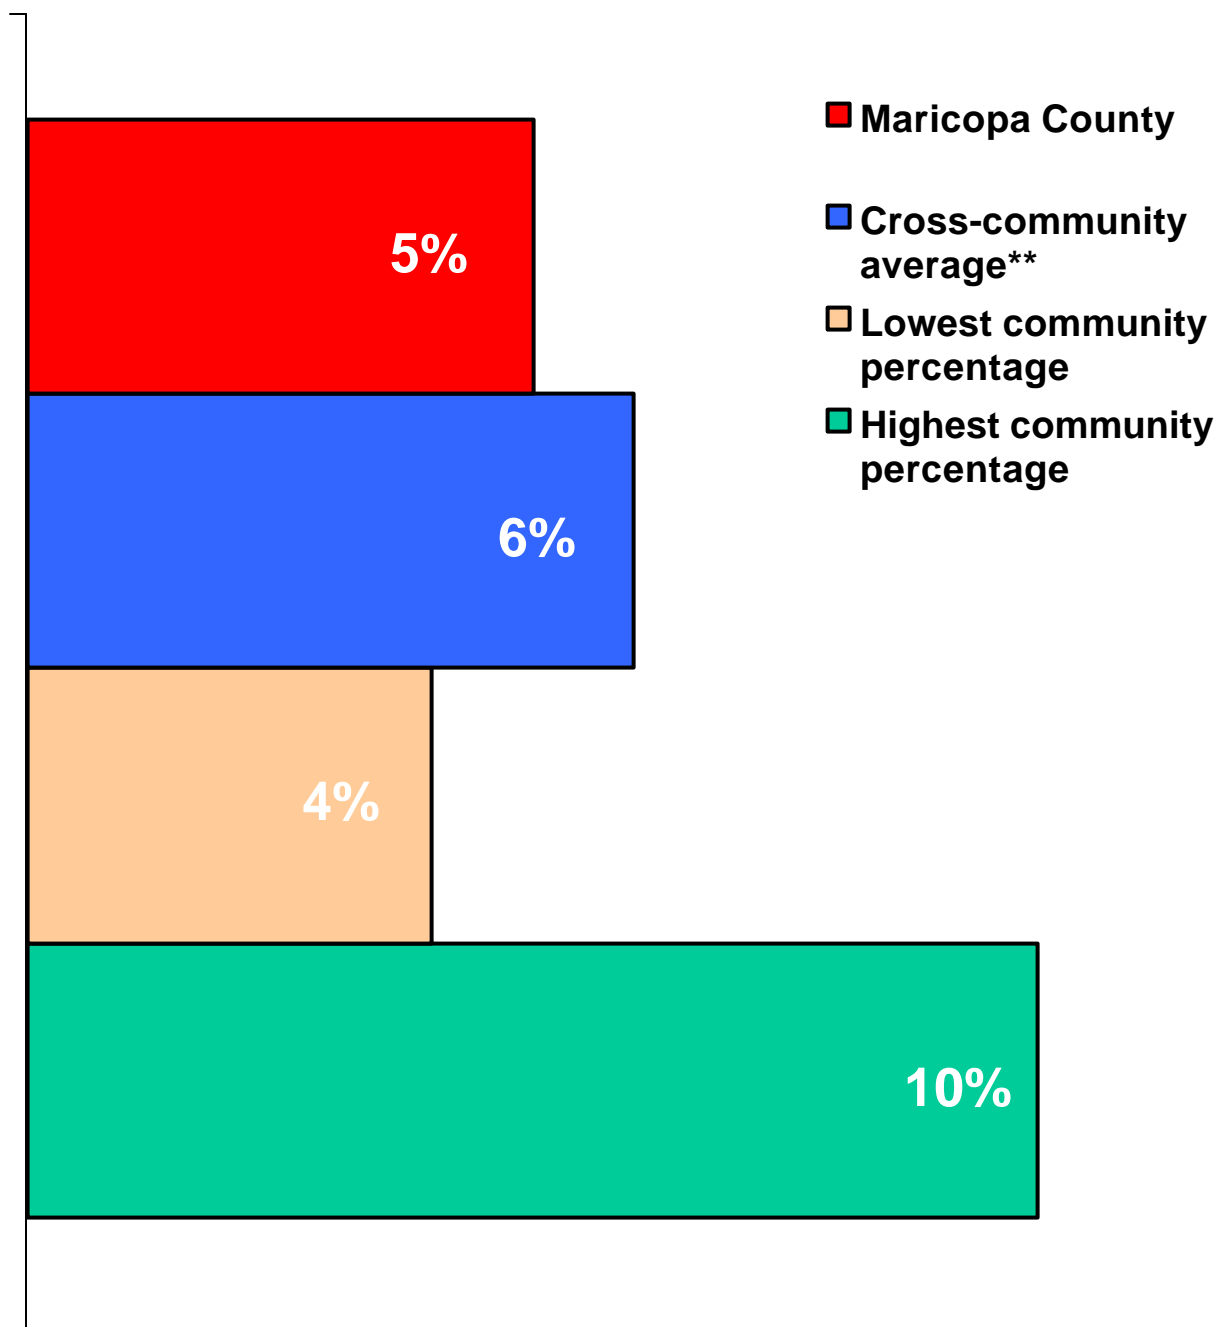

**The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.

Figure 17.3

ALL-COMMUNITY COMPARISON

Percentage of people age 65+ who failed to obtain needed medical care*

* The percentage of those who said they did not obtain the medical care they thought they needed is based on the subgroup of people who said that there was a time in the past year when they thought they needed medical care because they felt sick.

**The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.
