

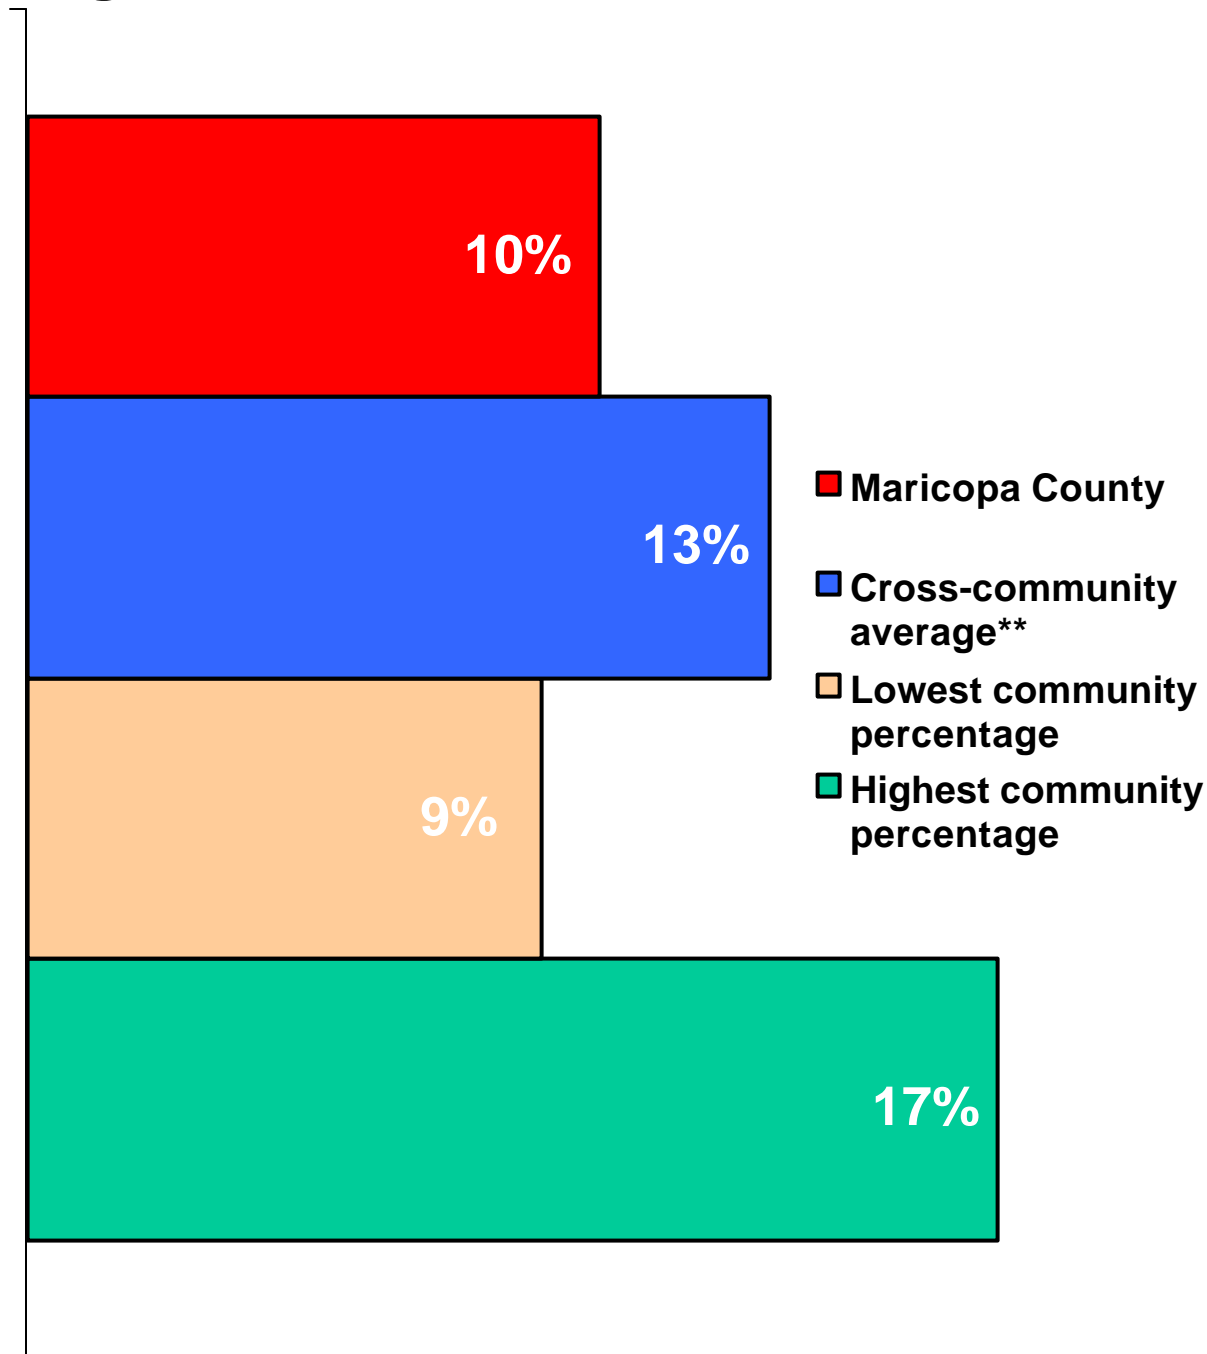

Figure 3.5

ALL-COMMUNITY COMPARISON

Percentage of householders age 65+ in housing units with home modification needs*

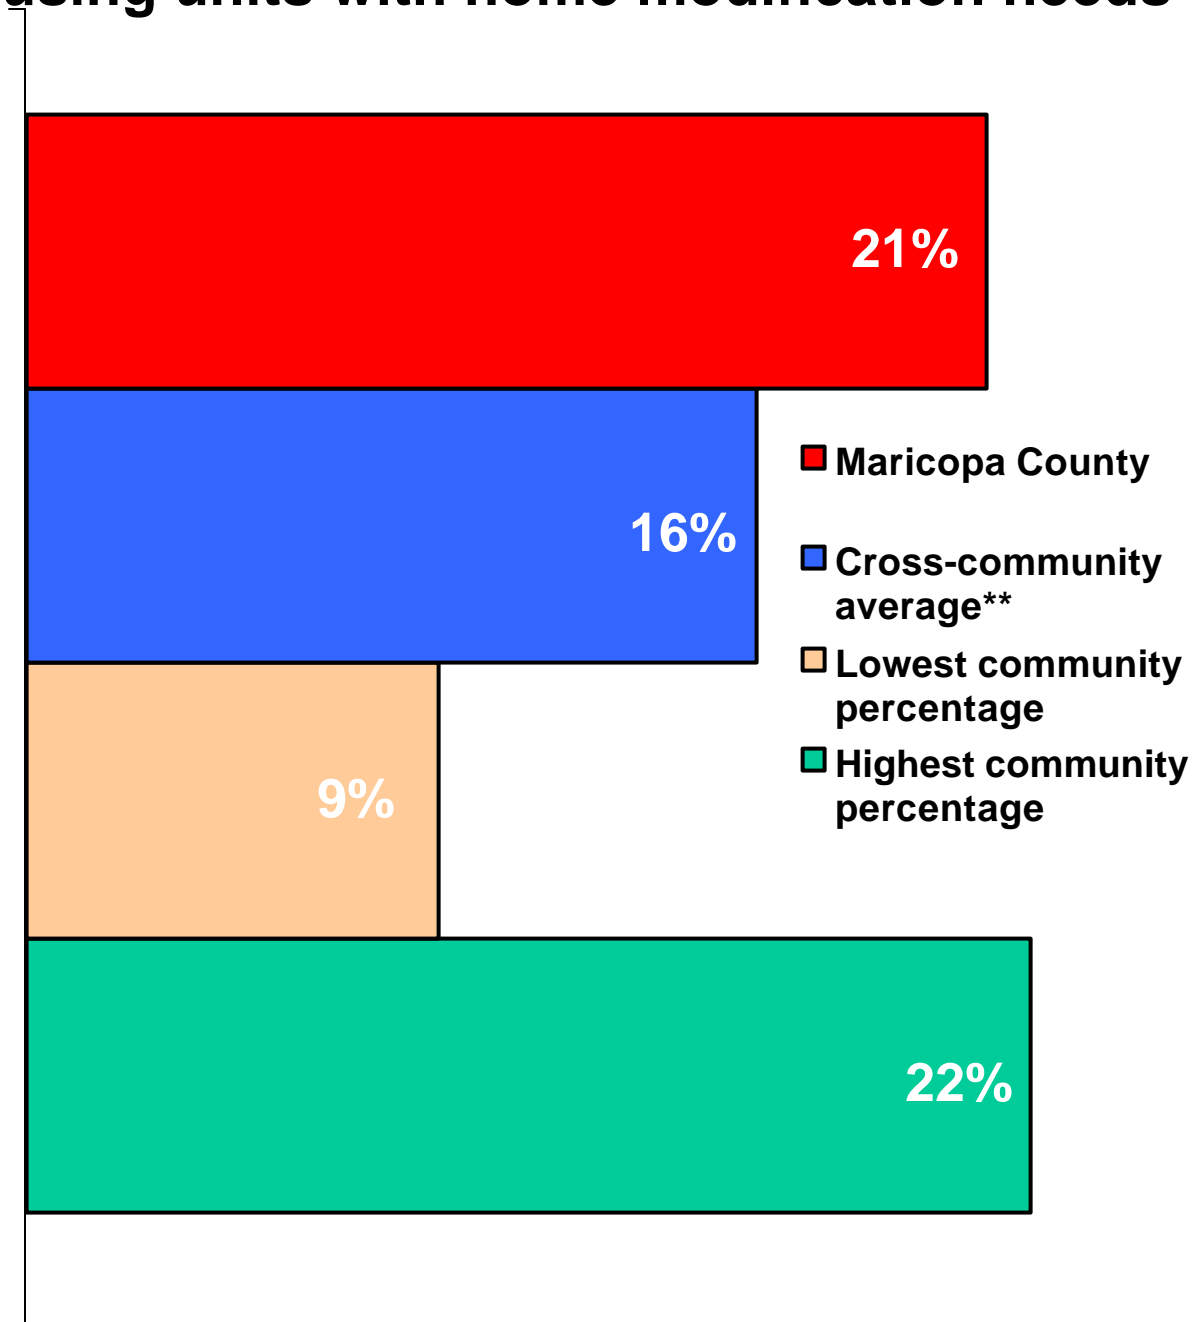

* Participants were asked whether their current residences need any significant repairs, modifications, or changes to improve their ability to live there over the next five years.

**The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.

Figure 3.6

ALL-COMMUNITY COMPARISON

Percentage of householders age 65+ who are not planning to make modifications among those in housing units with home modification needs*

* The percentage of those who are not planning to make modifications is based on the subgroup of people who said that their current residence needs one or more significant repairs, modifications, or changes to improve their ability to live there over the next five years.

**The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.
