

Figure 26.4

## ***ALL-COMMUNITY COMPARISON***

**Percentage of people age 65+ who do not get respite/relief from their caregiving activity among those who provide caregiving\***

\* The percentage of people who do not get respite is based on the subgroup of people who provide help or care, or arrange for help or care, for a relative or friend who is unable to do some things for him/herself due to illness or disability, in each community.

\*\*The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.
