

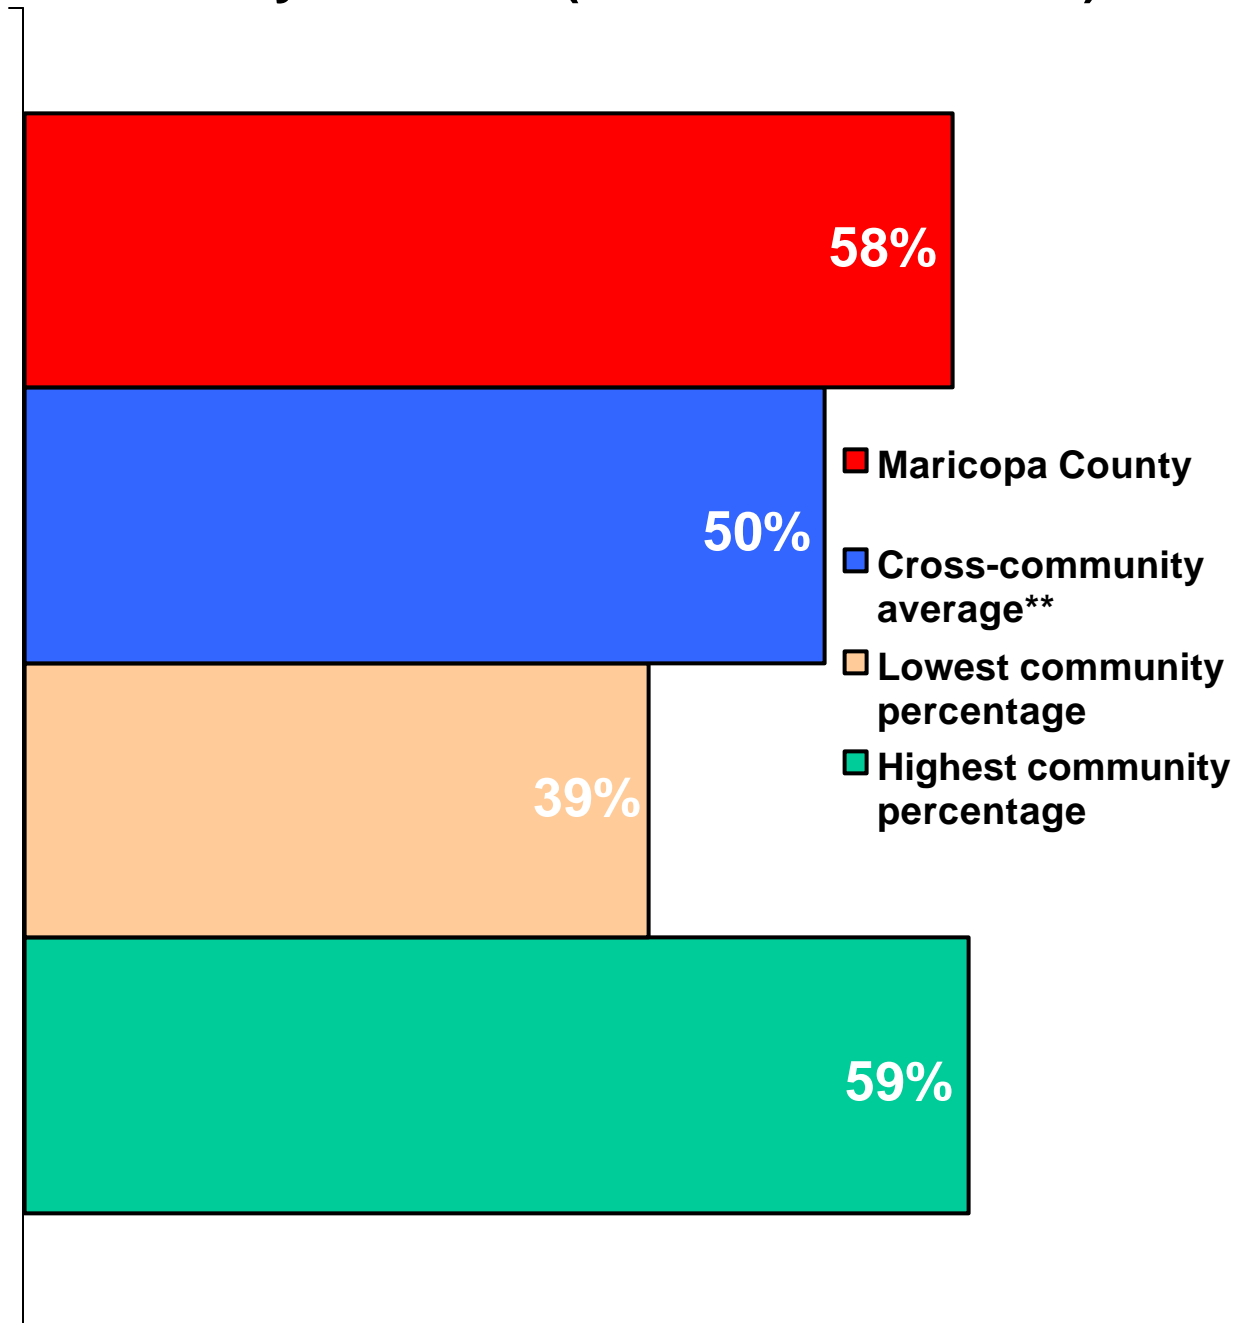

Figure 10.6

## ALL-COMMUNITY COMPARISON

Percentage of people age 65+ who have one or more unmet need among those who need assistance in basic daily activities (1+ ADL and/or IADL)\*

\* The percentage of those who have one or more unmet need is based on the subgroup who said they need assistance with one or more of the following activities: taking a bath or a shower, dressing, eating, getting in/out of bed/chair, using/getting to a toilet, getting around inside the home, going outside the home, doing light housework, preparing meals, driving a car/using public transportation, taking the right amount of prescribed medication, keeping track of money and bills.

\*\* The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.
