

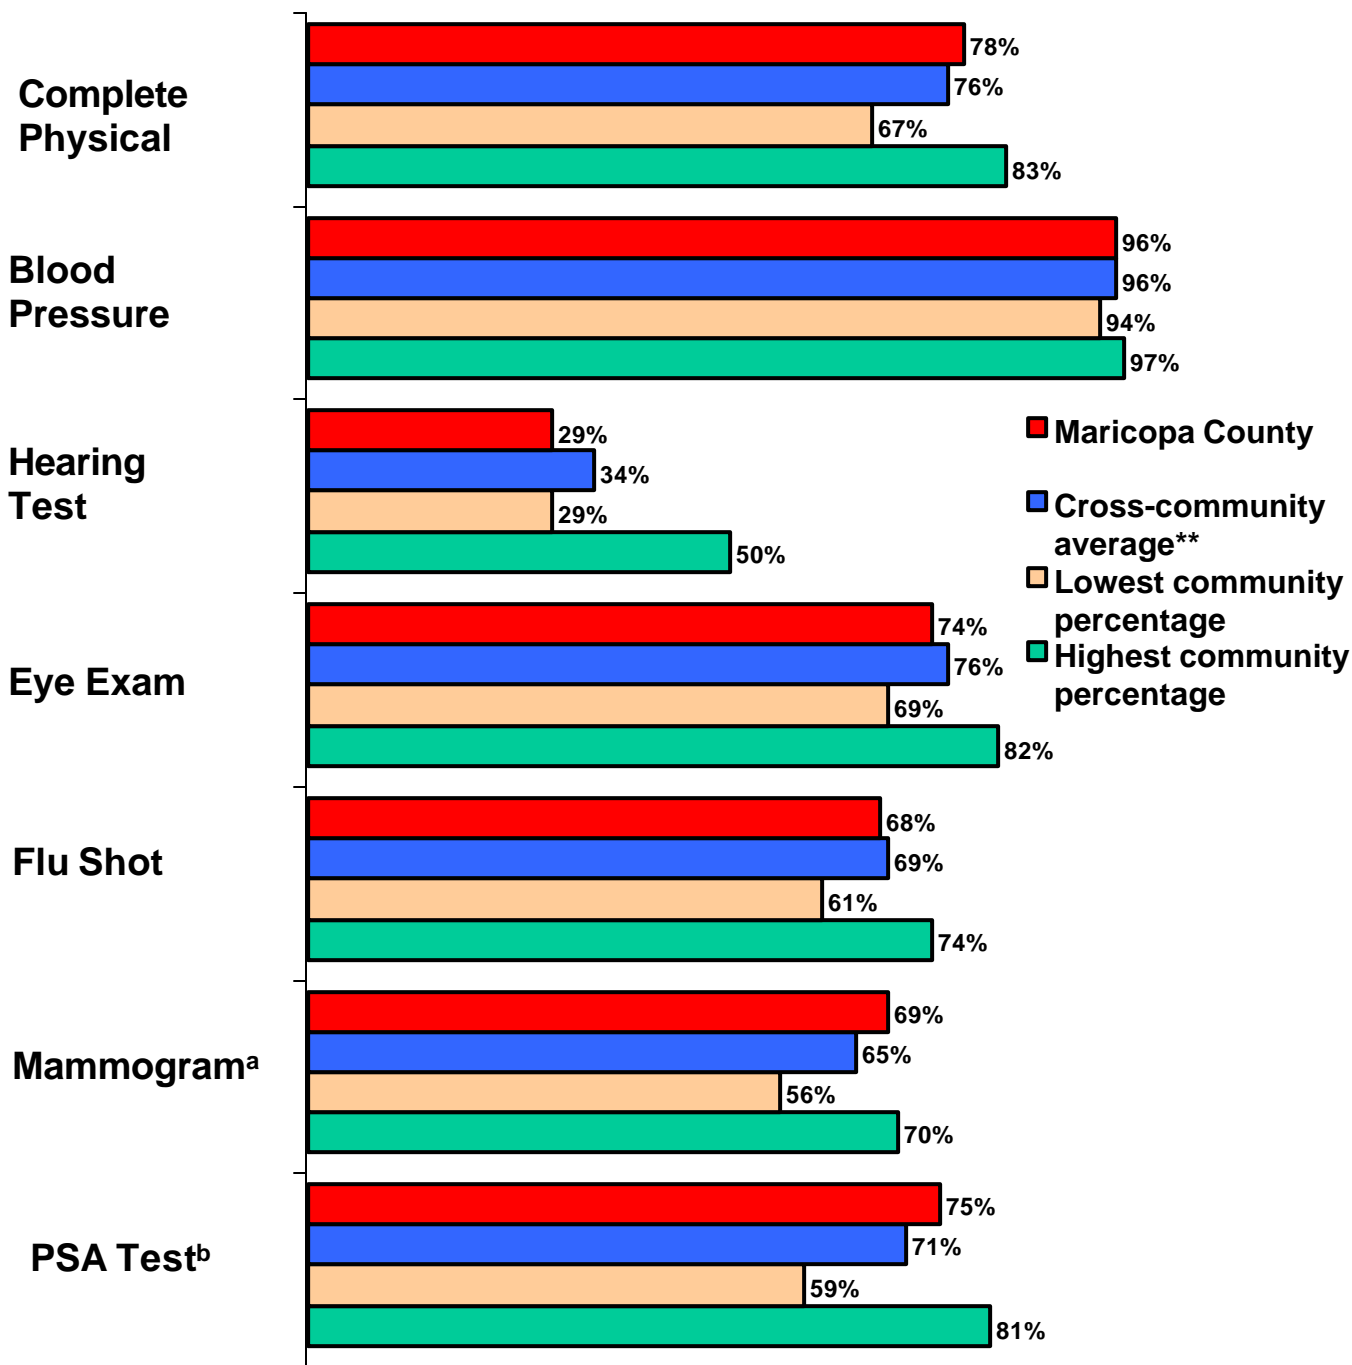

Figure 11.8

ALL-COMMUNITY COMPARISON

Rate of vaccination and screening for various conditions among people 65+*

*People were asked whether they had any of the above preventive measures or tests in the past 12 months.

** The cross-community average was obtained by calculating the percentage for each separate community, then summing these percentages and dividing by the total number of communities.

^a Mammogram for women only

^b PSA (prostate cancer screening) test for men only
