

MARICOPA COUNTY

Figure 28.1

Percentage of people age 65+ who attended church, temple, or other in the past week*

Note: Percentages may not add up to 100% due to rounding and/or missing information.

*Participants were asked if they went to church, temple, or another place of worship for services or other activities during the past week.

Unweighted N=619
Weighted N=351422

Center for Home Care Policy and Research
Visiting Nurse Service of New York

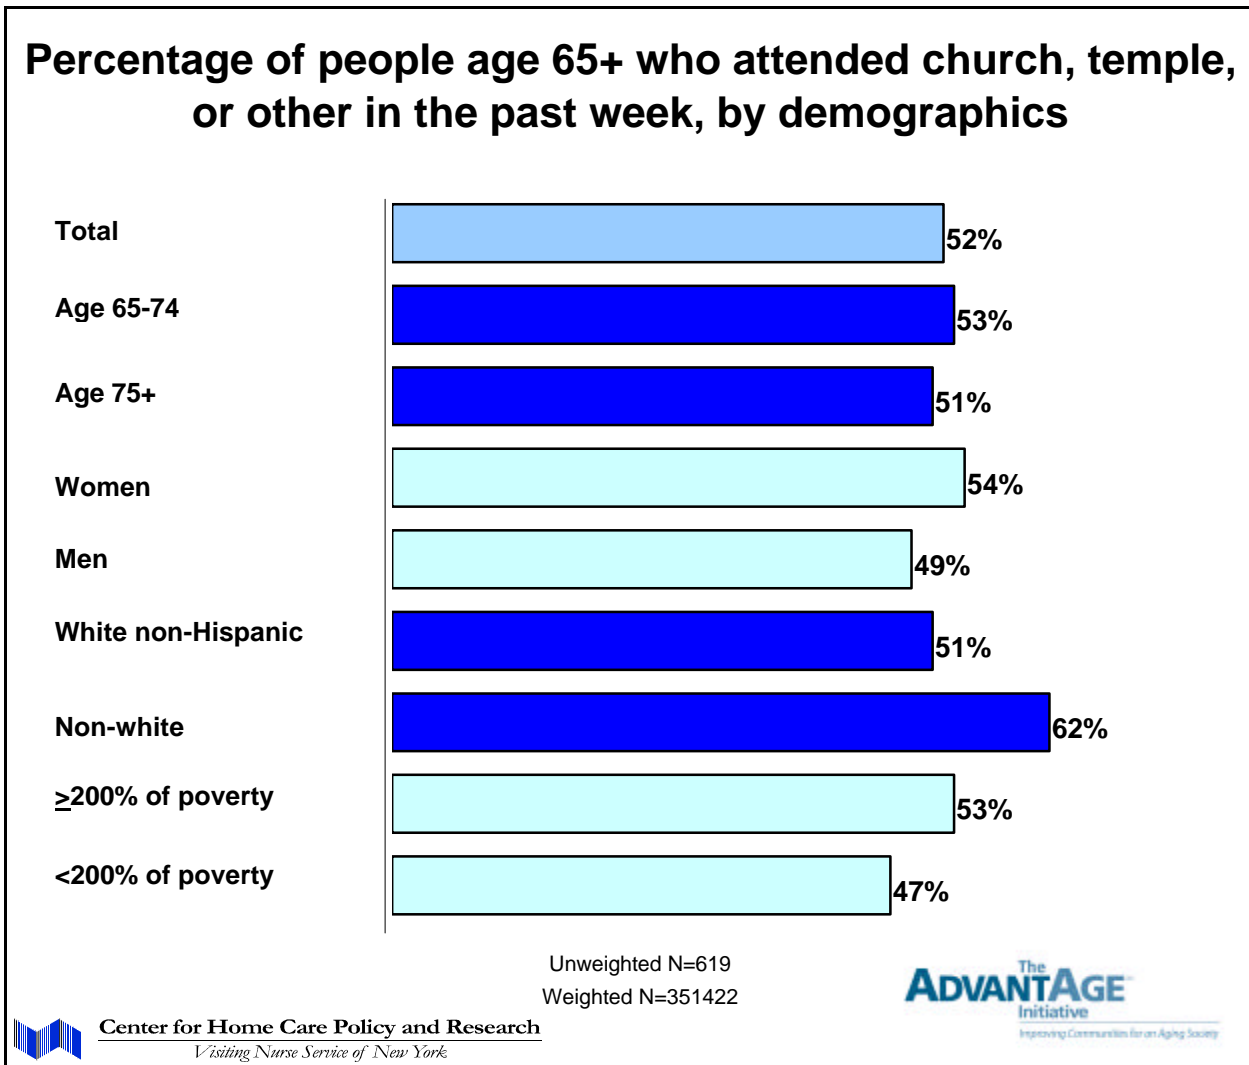

The ADVANTAGE Initiative
Improving Communities for an Aging Society

Overall, in Maricopa County, more than half (52%) of people age 65+ attended church, temple, or other religious activity in the past week. Nearly half (48%) did not.

Note: Indicator 28 corresponds to Question 86a in the AdvantAge Initiative survey questionnaire.

MARICOPA COUNTY

Figure 28.2

Overall, more than half (52%) of people age 65+ attended church, temple or other religious activity in the past week. Figure 28.2 shows differences by demographic characteristics. People with incomes at or above 200% of poverty and women are more likely than their counterparts to have attended church, temple, or other religious activity in the past week (53% vs. 47%; 54% vs. 49%, respectively). While the difference within the race category appears large (62% vs. 51%), note that the percentage of white non-Hispanics in this community is small. Therefore, caution should be exercised when making inferences by race.

MARICOPA COUNTY

Figure 28.3

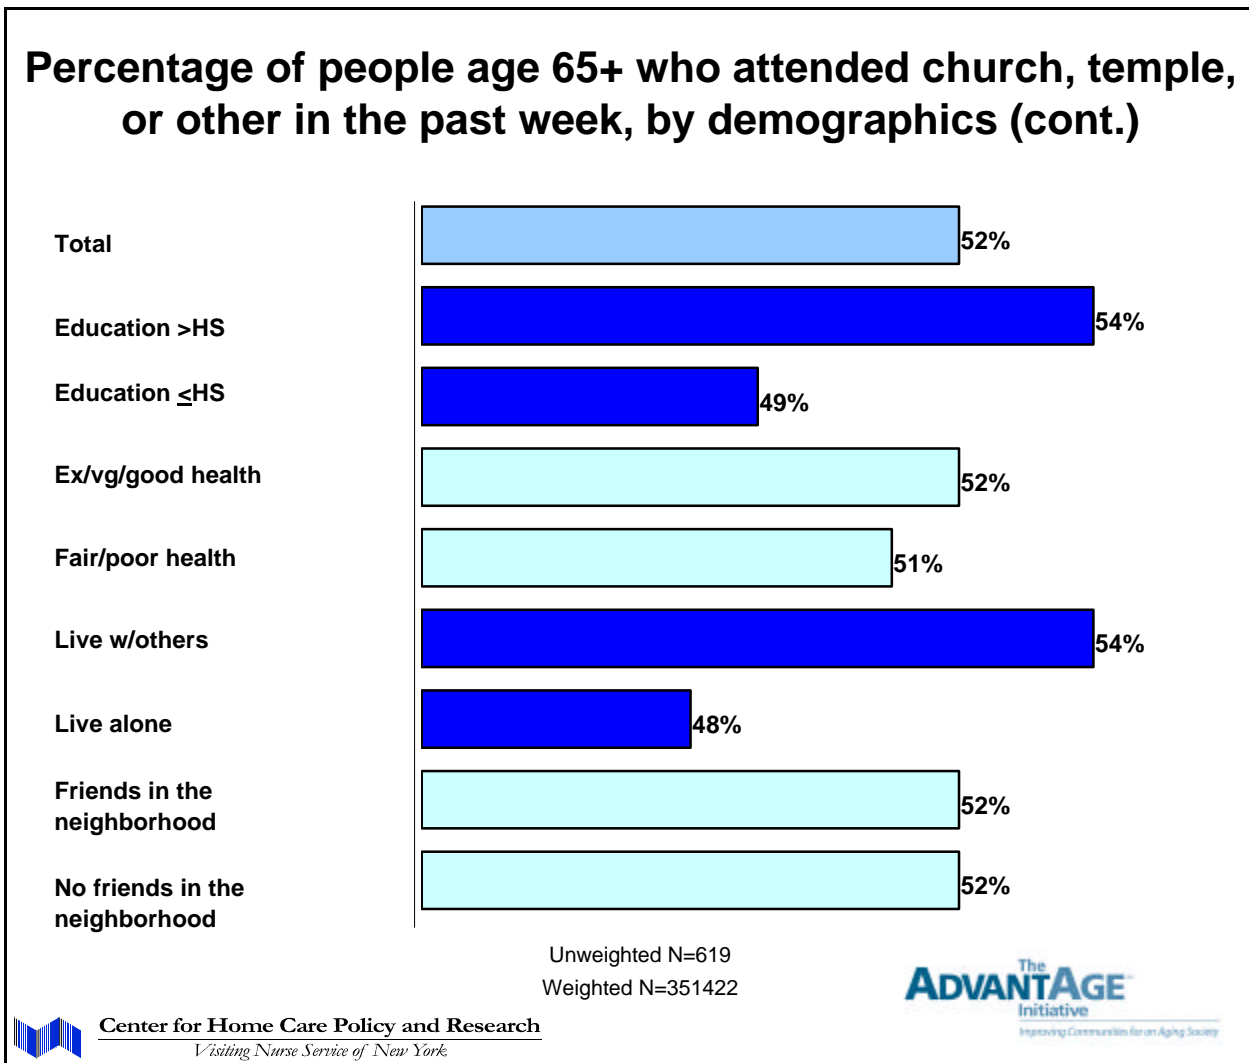

Figure 28.3 shows additional differences by demographic characteristics. People age 65+ who live with others and those with more than a high school education are more likely than their counterparts to have attended church, temple, or other religious activity in the past week (54% vs. 48%; 54% vs. 49%, respectively). The difference is minimal within the health status category.

Note: HS=high school; Ex=excellent; vg=very good.
