

MARICOPA COUNTY

Figure 33.1

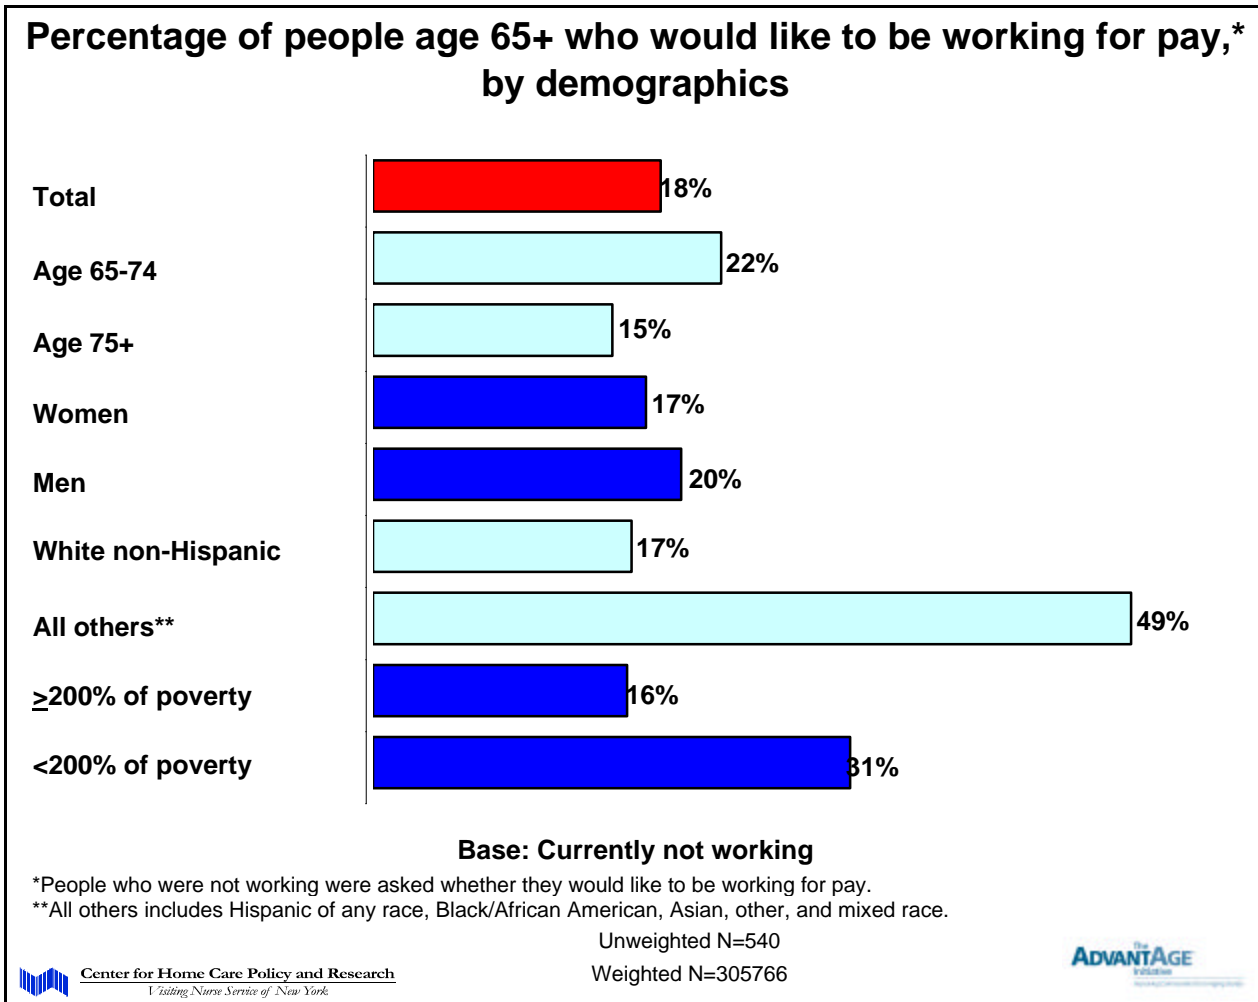

In Maricopa County, only four percent of people age 65+ are working full time; nearly one of ten (9%) are working part time; and nearly nine of ten (87%) people are not currently working. Of those not currently working nearly one of five (18%) say that they would like to work for pay; four of five (80%) would not like to work for pay; and two percent do not know.

Note: Indicator 33 corresponds to Questions 92 and 94 in the AdvantAge Initiative survey questionnaire.

MARICOPA COUNTY

Figure 33.2

Overall, nearly one of five (18%) people age 65+ currently not working say that they would like to work for pay. Figure 33.2 shows differences by demographic characteristics. People with incomes below 200% of poverty are more likely than those with higher incomes to say that they would like to work for pay (31% vs. 16%). While the difference within the race category appears large (49% vs. 17%), note that the percentage of people other than white non-Hispanic is small in this community. Therefore, caution should be exercised when making inferences by race. The differences are small within the other demographic categories.

MARICOPA COUNTY

Figure 33.3

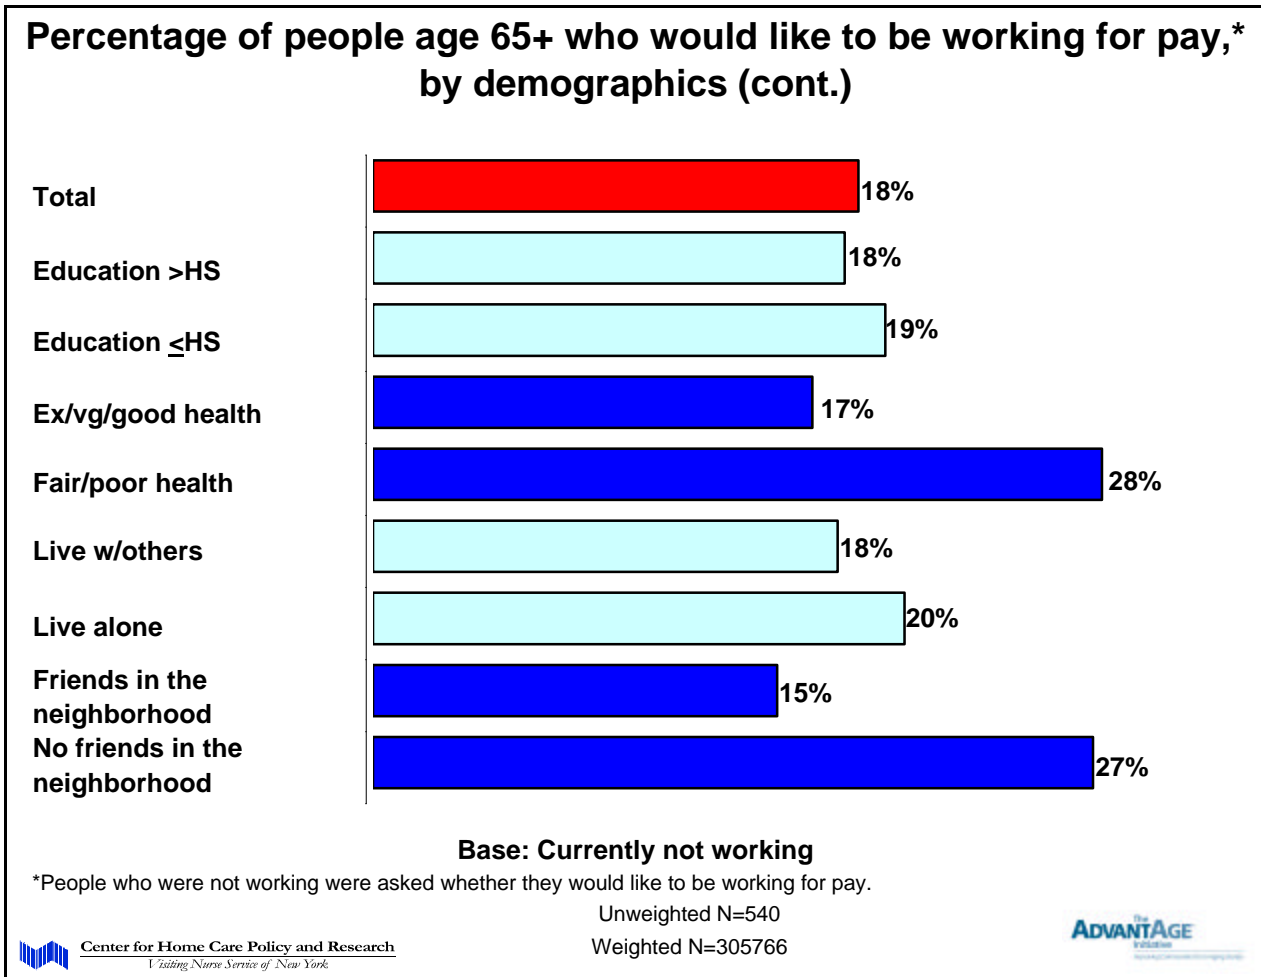

Figure 33.3 shows additional differences by demographic characteristics. People without friends in the neighborhood and those in fair or poor health are more likely than their counterparts to say that they would like to work for pay (27% vs. 15%; 28% vs. 17%, respectively). Differences are minimal within the education and household type categories.

Note: HS=high school; Ex=excellent; vg=very good.
