

MARICOPA COUNTY

Figure 18.1

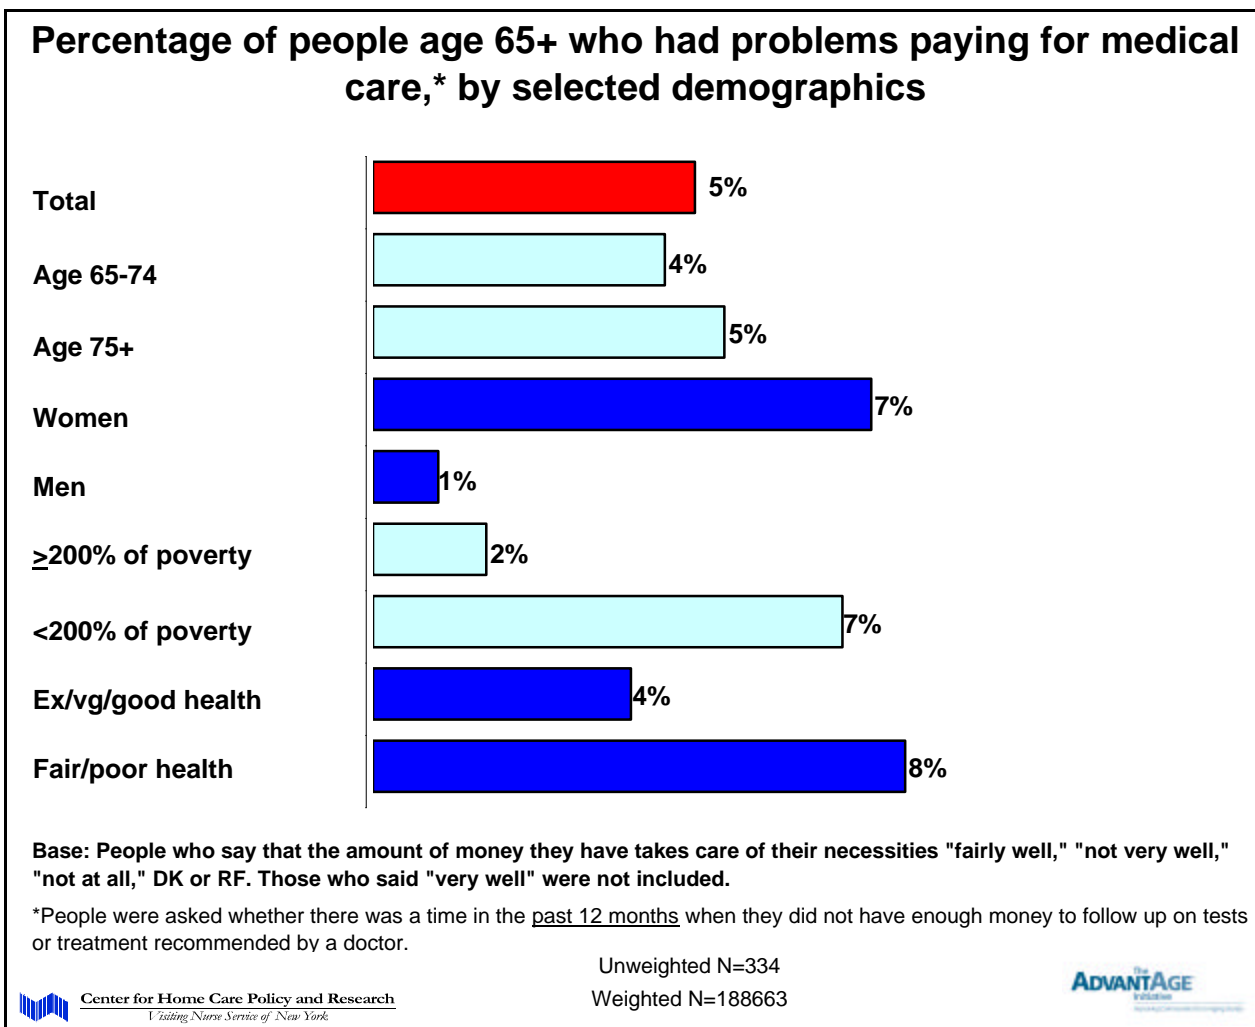

People age 65+ were asked a screener question inquiring how well the amount of money they have takes care of their necessities. *Only those* who answered "fairly well," "not very well," "not at all," "don't know," or refused were asked a series of questions regarding a time in the past 12 months when they did not have enough money to pay for various services. In Maricopa County, five percent of people from this group say that there was a time in the past 12 months when they did not have enough money to follow up on tests or treatment recommended by a doctor.

Note: Indicator 18 corresponds to Questions 99 and 100d in the AdvantAge Initiative survey questionnaire.

MARICOPA COUNTY

Figure 18.2

Overall, five percent of people age 65+ who said that the amount of money they have takes care of their necessities "fairly well," "not very well," "not at all," "don't know," or refused say that there was a time in the past 12 months when they did not have enough money to follow up on tests or treatment recommended by a doctor. Figure 18.2 shows differences by selected demographic characteristics,¹ which are small within all the demographic categories.

Note: Ex=excellent; vg=very good.

¹Differences are presented by selected demographic characteristics because there was minimal variation within most demographic categories.
